DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 3-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The last five lines of claim 1 are not clear and read as a run-on sentence.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art (AAPA) in view of USPN 6,544,816 to Lim et al in view of EP472768A and in view of JP11006073A and JP403101141A. The claimed article is a semiconductor material comprising a device portion and an interposer. AAPA describe (Specification, Background of the Invention) well known ball grid array manufacture and related process manufacturing. Lim et al describe well known use of an interposer and chips in the cavity of a mold. EP472768A describe (Basic Abstract) well known roughening using a laser beam in order to improve the area for bonding. JP11006073A discloses (Basic Abstract: Novelty) simultaneous cutting and roughening

with a laser. JP403101141A describes well known use of a laser for removal of oxide and contamination from a surface in order to improve yield of a bonding process. AAPA and Lim et al describe well known encapsulation of semiconductor packages and the use of interposers are well known as disclosed by Lim et al. EP472768A is an example of well known roughening using a laser beam prior to a bonding process. JP11006073A discloses cutting and roughening with a laser. The use of a laser for roughening an interposer would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because the laser is well known for cleaning and roughening prior to both bonding and molding.

Process and apparatus limitations are recited in the article claims 1 and 3-6 and these limitations do not impart structural patentability to the article claims. The article structure must define over prior art.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1725

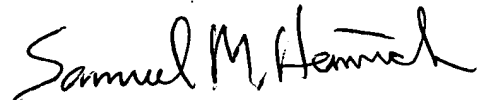

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
